IP AND VIDEO SECURITY

Digital Watchdog® offers complete enterprise-class video surveillance solutions for analog and IP Systems.

IP Solutions: **Blackjack® E-Rack™ Servers** offer up to 600Mbps throughput and support up to 128 1080p cameras with hot swappable hard drives providing up to 216 Terabytes of total storage. **DW Spectrum®™ IPVMS** makes it easy to manage all that power with limitless scalability and unrivaled ease of use. Crystal-clear **MEGApix® IP cameras** now include the world's only **48 Megapixel multi-sensor camera** that delivers unprecedented wide-view, plenty of resolution to reveal details and frame rates up to real-time 30fps. **Multi-sensor cameras** allow you to see more from one installation.

Analog Solutions: High resolution imaging is now available for analog video surveillance. **STAR-LIGHT™** super low light cameras include **Universal HD over Coax®** models and the world's first **Analog-HD multi-sensor user configurable and 180° view panoramic HD analog cameras**. **VMAX® A1™ Universal HD over Coax® Digital Video Recorders** record all HD analog formats and all analog to 960H.

Sperry West is a pioneer in the video surveillance and security industry, developing the first commercial video surveillance kit, the **Video Commander**. Sperry West **covert cameras** are everyday items that go undercover to get the job done without detection. Their high-quality cameras are discretely built into actual products for complete realism. They have the best image available from a covert video camera. Most covert cameras are available in high-resolution and now available with Wi-Fi.

Ventra Technology is an innovative leader in **Vehicle Centric, Mobile Video Recording and Fleet Management Solutions**. With a primary focus on offering leading edge technology which enhances the overall Safety, Security and Management of vehicle operation and the security of personnel. Ventra combines advanced hardware with powerful, yet intuitive software to easily manage, customize and analyze essential data. Ventra provides comprehensive local and cloud solution that can be easily implemented in any vehicle, application or industry. Ventra "Safety and Security Through Intuitive Analytics".

Scott Cappelletti

NE Regional Sales Manager
New England & Upstate NY

Office: 631-435-1010 x 300

ACCESS CONTROL

RBH Access—from **Small Business to Enterprise Access Control Solutions**, RBH has packages specifically tailored to a customer’s needs. Utilizing the latest in Microsoft platform technology, RBH delivers responsive and reliable software on the desktop, server and over the web. Robust controllers work in the harshest of environments and in a variety of applications all over the globe. Employing open interface protocols allows for a great selection of available identification devices from proximity, to fingerprint and iris, as well as a myriad of other technologies available on the market today.

ProdataKey’s wimac™ (Wireless Mesh Access Control) technology communicates between doors wirelessly up to one mile with their true plug and play solution. Prodatakey is easy to use, flexible and cost effective delivering a one of a kind wireless and IP access control system, expandable from one to over a thousand doors. (Except WV)

AWID (Applied Wireless Identification Group, Inc.) world-wide leading provider of **RFID products and solutions** for embedded markets, security industries, and fast-growth value-added RFID solutions. With their focus on OEM, distributor, VAR and SI channel management. AWID products include RFID modules, readers, and tags, spanning LF, HF and UHF technologies.

IDEMIA (formally MorphoTrak) the world leader in **biometrics** with award winning algorithms and technology, provides the most versatile and robust **fingerprint readers for access control**. Their Sigma series operates with any access control system or for stand-alone installations, with terminals for both indoor and outdoor use along with models that provide the option of a built-in reader for use with prox, iClass or Mifare cards.

WIRELESS

Ascendance Wireless is a global leader of intelligent, **fixed wireless IP network solutions** with a primary focus on mission-critical applications within the Security, Access Control and Telecom industries. Their range of solutions enable real-time, simultaneous transmission of video, voice, and data in **Point-to-Point (PtP)** and **Point-to-MultiPoint (PtMP)** networks with an unmatched level of performance, ease of use, flexibility and carrier-class reliability. In addition to wireless products,, Ascendance also delivers Access Control Interface Extender and Solar Power products. (Except VA & WV)

ACCESSORIES

American Video Equipment (AVE) is a leading provider of Bank ATM, Cash Register Video Serial Interfaces (**VSI Pro**), cameras, video switchers, I-Check Video I.D. Video Systems, PIPC Color Picture in a Picture, Time/Date Titlers, VCR’s, Video Transmission and Motion Detectors.

BlackHawk Labs manufacturers wall mounted enclosures designed in a vertical orientation. MiniRaQ™ family includes the **MiniRaQ™ Open, MiniRaQ™ Secure & MiniRaQ™ Custom**—customized to customer’s requirements.

Para Systems Inc. is a leading provider of power protection and management products including the **Minuteman™** line of **Uninterruptible Power Supplies (UPS)** for computer, server, peripherals, voice and data communication systems, security and other mission-critical equipment. (New England Only)

Veracity designs, develops and markets innovative transmission, storage and display products focusing on high-bandwidth megapixel IP camera systems. Products include **LongSpan, OutReach Max and COLDSTORE**. **COLDSTORE** is a highly reliable, high capacity video storage solution offering massive power savings through the use of a Linear Array of Idle Disks (LAID™) system combined with a Sequential Filing System™ (SFS).

Telecom & Security is an Italian manufacturer of accessories for Telco/ICT Systems. Their core product is the **CaP**, a worldwide patented connector for coaxial cables which substitutes the classic F-type metallic, twist-on/crimp/compression connectors. CaP has received many international awards, most notably “Innovation 2001” and “Best of CES 2001” in 2001 at CES in Las Vegas. CaP is completely and proudly designed in Italy and sold in all 5 continents.
